IMPORTANT INFORMATION With effect from 1 June 2008 Net Asset Values and returns have been restated on a cum income basis in accordance with the practice of the Association of Investment Companies of which Hansa Trust PLC is a member. Total Returns on Net Asset Value and Shares have been sourced from unaudited internal management information and from the Close WINS Investment Trusts database, and assumes all dividends are re-invested. Other than Standardised Performance Information prices quoted are mid price and performance returns are mid to mid.

Risk Warning: The information provided here has been issued by Hansa Capital Partners LLP, which is authorised and regulated by the Financial Conduct Authority. Share and performance information has been compiled by Hansa Capital partners LLP. Past performance is not necessarily a guide to future performance as market and exchange rate movements may cause the value of shares and income from them to fall as well as rise, and an investor may not get back the amount invested. Investment Trust share prices may not fully reflect underlying net asset values. The spread on Investment Trusts typically averages 1-2% each way on the mid-market price (the price half way between the bid and offer prices). However, investors wishing to invest in Hansa Trust 'A' shares should note that the market for these shares is at times quite illiquid which leads to a large spread between the buying and selling prices, the bid to offer spread. For example, for the 'A' shares, as at 31 May 2015 the bid to offer spread was 0.35%*.
